

# AUSPIFY

Bring Future Through Tech

## MACHINE LEARNING TASK LIST

### Internship Program

4-Week Practical Learning Program

# ABOUT US

Auspify Technologies is a technology and training platform dedicated to helping students build industry-ready skills through internships and project-based learning.

We bridge the gap between academics and industry by providing practical experience, real-world projects, and hands-on training.

Our focus is on empowering learners with the knowledge, confidence, and professional skills needed to succeed in their careers.

**Learn • Build • Grow**

# INTERNSHIP OVERVIEW

A 4-week remote internship program designed to provide practical learning, real-world project exposure, and industry-relevant skill development.

## Features :

- Flexible Learning Schedule
- Hands-On Tasks & Projects
- Beginner-Friendly Structure
- Portfolio Building Support
- Industry-Oriented Experience

**Open To:** Students, Freshers, Self-Learners & Aspiring Developers

# PROFESSIONAL GUIDELINES & SHOWCASE

## Professional Guidelines :

- Complete assigned tasks responsibly and within deadlines.
- Ensure all submissions are original and plagiarism-free.
- Maintain organized folders for each task and project.
- Follow professional standards in communication and project delivery.

## Professional Showcase :

Interns are encouraged to share their internship journey and projects to build a strong professional presence.

### Benefits :

- Strengthen Your Portfolio
- Increase Professional Visibility
- Demonstrate Practical Skills
- Expand Networking Opportunities

**Share :** Project Screenshots, Demos, Milestones, Learning Achievements, and Project Walkthroughs.

**Hashtags :** #Auspify #AuspifyTechnologies  
#AuspifyInternship #AuspifyProjects

## MACHINE LEARNING

# Task List

**Welcome to our Machine Learning Internship Program!**

Throughout this internship, you will work on 6 practical Machine Learning tasks designed to enhance your predictive modeling, data analysis, algorithm development, and problem-solving skills using Python and modern machine learning tools. To successfully complete the internship, you need to finish **any 4 out of the 6 tasks** based on your interests, skills, and learning goals.

# Task 1 (Easy) – Netflix Content Recommendation System

**Description :** Build a machine learning-based recommendation system that suggests similar Netflix titles based on genres, categories, and content attributes.

## Task Workflow

Step 1: Prepare content-related features.

Step 2: Convert text data into machine-readable format.

Step 3: Calculate content similarity scores.

Step 4: Generate recommendations for selected titles.

Step 5: Evaluate recommendation quality.

## Skills You Will Learn

- Recommendation Systems
- NLP Fundamentals
- Feature Engineering
- Scikit-Learn

## Key Features

- Content-Based Recommendations
- Similarity Analysis
- Feature Extraction
- Personalized Suggestions

# Task 2 (Easy) – Content Type Prediction Model

**Description :** Develop a machine learning model to predict whether a Netflix title is a **Movie or TV Show** based on its available features.

## Task Workflow

Step 1: Select relevant dataset features.

Step 2: Encode categorical variables.

Step 3: Train classification models.

Step 4: Evaluate prediction performance.

Step 5: Compare model accuracy.

.

## Skills You Will Learn

- **Classification Algorithms**
- **Data Encoding**
- **Model Validation**
- **Machine Learning Workflow**

## Key Features

- **Binary Classification**
- **Feature Selection**
- **Model Training**
- **Performance Evaluation**

# Task 3 (Medium) – Netflix Audience Rating Classification

**Description :** Build a model that predicts the audience rating category of Netflix content using content attributes.

## Task Workflow

Step 1: Analyze rating categories.

Step 2: Prepare training datasets.

Step 3: Train classification models.

Step 4: Optimize model performance.

Step 5: Evaluate prediction accuracy.

## Skills You Will Learn

- Decision Trees
- Random Forest
- Classification Metrics
- Hyperparameter Tuning

## Key Features

- Rating Prediction
- Multi-Class Classification
- Model Comparison
- Accuracy Analysis

# Task 4 (Medium) – Netflix Content Segmentation

**Description : Group Netflix titles into meaningful clusters using unsupervised machine learning techniques.**

## **Task Workflow**

Step 1: Prepare numerical and categorical features.

Step 2: Apply clustering algorithms.

Step 3: Identify content groups.

Step 4: Visualize clusters.

Step 5: Interpret cluster characteristics.

## **Skills You Will Learn**

- **K-Means Clustering**
- **Data Scaling**
- **Cluster Analysis**
- **Unsupervised Machine Learning**

## **Key Features**

- **Content Segmentation**
- **Cluster Visualization**
- **Pattern Discovery**
- **Unsupervised Learning**

# Task 5 (Advanced) – Netflix Trend Forecasting Model

**Description :** Develop a machine learning model to forecast future Netflix content release trends based on historical data.

## Task Workflow

Step 1: Prepare time-based features.

Step 2: Analyze historical release patterns.

Step 3: Build forecasting models.

Step 4: Generate future predictions.

Step 5: Evaluate forecasting accuracy.

## Skills You Will Learn

- Time Series Forecasting
- Predictive Analytics
- Model Evaluation
- Trend Analysis

## Key Features

- Trend Forecasting
- Time-Based Analysis
- Predictive Modeling
- Future Insights

# Task 6 (Advanced) – Netflix Content Success Analytics Engine

**Description :** Develop an end-to-end machine learning solution that analyzes content patterns and generates intelligent business insights.

## Task Workflow

Step 1: Perform advanced feature engineering.

Step 2: Build multiple machine learning models.

Step 3: Compare model performance.

Step 4: Generate automated insights.

Step 5: Present findings through visual reports.

## Skills You Will Learn

- Machine Learning Pipeline Development
- Feature Engineering
- Model Optimization
- MLOps Fundamentals

## Key Features

- End-to-End ML Pipeline
- Automated Insights
- Predictive Analytics
- Business Intelligence

## INTERNSHIP OVERVIEW

### **Project Submission Process:**

Interns are required to submit the following:

- Project Source Code
- Screenshots of Completed Tasks
- GitHub Repository Link (if available)
- Project Demonstration Video (optional)

A submission form or portal will be shared separately for final evaluation and project verification.

## EVALUATION CRITERIA

### **Project Evaluation Parameters:**

Projects may be evaluated based on:

- Task Completion
- Code Quality
- Website Responsiveness
- User Interface Design
- Creativity & Implementation
- Professional Presentation
- Project Functionality

## CERTIFICATION

### Internship Completion Recognition

- Internship Completion Certificate
- Project Completion Recognition
- Internship Experience Acknowledgment

### Certification eligibility depends on:

- Successful task completion
- Proper project submission
- Basic project verification
